

# & STABILITY

## FEATHER SHUTTLECOCKS

YONEX has been painstakingly hand making the best feather shuttlecocks in the world since 1965. Each of our shuttles is assembled by a team of expert craftsmen using only the finest materials. They are then individually tested to make sure they deliver consistent flight trajectory, accuracy and distance at all temperatures. That's why the best players and the biggest tournaments in the world choose YONEX shuttlecocks.

## NYLON SHUTTLECOCKS

YONEX precision MAVIS Nylon shuttlecocks are the closest you can get to traditional feather. Designed to have the same flight time as a feather shuttle, they give an accurate and durable performance with a traditional feel.

Tube cap	GREEN	BLUE	RED
Speed	SLOW	MIDDLE	FAST
Temperature	22°C-33°C	12°C-23°C	0°C-13°C

The hardness of the skirt – the feather part of the nylon shuttlecock – varies depending on temperature.

Players should always use the shuttlecock best suited to the playing environment.

Always store shuttlecocks away from high temperatures and keep the tube upright with the cork side of the shuttlecock facing down.
